## **Goals and Objectives:**

- Review and minor changes

## **Trail Plan Essentials:**

- Want to adopt trail plan so enforceable in new developments
- Goal is to highlight key issues of plan in beginning of document, don't want to have to look for key issues. Want to organize it so there is almost a pullout summary at start.

## **Executive Summary:**

- Need to add information on extensive outreach
- Take another shot at rewriting.

## **Setting Priorities: emphasis on routes.**

- Extensive discussion on need for and how to write up routes
- This will be tough and need to get started as it will take lots of review.
- Divide routes in segments, can list alternatives. ie can list option if we can get shared use path to work but also list option of shoulder route.
